Part B for May '45

SUBJECT

Starting of a Dairy farm on the Municipal Sewage farm in Mysore at a cost of Rs 30,000

Pdt. Chief Sec. to Govt. of Mysore
The Director of Agriculture
Comptroller through the Secretary
L 10739-9 dated 28-4-45
Sanctions the proposals.

HS
93/6

Letter No M 5, 46-201/44 d 14-10-44, from the President, to the Municipal Council, Mysore, forwarding for orders of Government a copy of resolution of the Municipal Council, d 11-10-44, to the effect that action be taken to start a Municipal Dairy Farm, in the Sewage Farm, as it has become difficult to get pure and cheap milk in Mysore and 2) to request Government for a loan of Rs 30,000- towards the initial expenditure, for the purchase of live stock, etc, free of interest, to be repaid in ten annual instalments

1) Submitted for perusal

2) In connection with the supply of pure milk which is a long felt want in the Mysore city, the Municipal Council have proposed the starting of a Municipal Dairy Farm as part of the Sewage Farm at Mysore In that connection the Director of Agriculture has forwarded a comprehensive scheme, the financial aspect of which is summarised below —

For a Dairy Farm with 40 cows (Scindhi) and 40 Buffaloes (Delhi or Murrha), etc

Initial Non-recurring expenditure

Live Stock	Rs. 35,000
Buildings	48,400
Machinery & Appliances	8350
Total	Rs. 91750-

P J o

WD 0726—GPB—25 000—10 9 44

Recurring charges

Live Stock maintenance	Rs 11250-
Establishment	4200--
Work Establishment	3672
Agricultural work	750 --
Interest and Depreciation	6487
Total Rs	26359--

Anticipated Return

Value of milk available for sale per annum	26280
Sale of calves	960
Rs	27240

net profit (Rs 27240 - 26360) Rs 880

3) The Mysore City Municipal Council have now proposed to adopt only a portion of the comprehensive scheme, by starting a Dairy Farm at Mysore, with 20 Sandhi Cows and 20 murrah buffaloes and two Stud, bulls and other necessary equipment, at a cost not exceeding Rs 30,000 in all

4) As there is no provision in the current years Sanctioned Budget of the Mysore City Municipality, for the purpose, the Municipal Council have resolved to approach Government for a loan of Rs 30,000, towards the initial expenditure, for the purchase of live stock, etc, free of interest, to be repaid in 10 annual instalments

5) The cost of the purchase of 20 cows and

20 Buffaloes and 2 bulls, comes to Rs 17,100- as per figures furnished by the Director of Agriculture The cost of the establishment, equipment and other incidental charges is estimated at Rs 12900-, the details for which have not been furnished by the President

6) The Municipal President has sought orders on the following points —

1) to start a Municipal Dairy Farm as part of the Municipal Sewage Farm

2) to the grant of a loan of Rs 30,0000 to the Mysore City Municipal Council by Government, free of interest repayable in ten annual instalments

3) to purchase the necessary livestock through the Agricultural Department

4) to entertain the necessary establishment

5) to purchase the implements and machinery required in this connection

6) to incur such other incidental expenditure as may be necessary for the working of the Dairy Farm

for orders

7) The proposals have been made in consultation with the Director of Agriculture & the Chief of the Veterinary & Livestock Department The details

LETTER SORE

27) When I was President of the Mysore City Municipality, proposals re starting a Joint-Stock Company with a capital of Rs 1/- lakh had been submitte I do not know what happened to them At that time 1/3 of the capital, i e , over Rs 33,000 was promised to be subscribed by the Municipality out of its own funds I requested the Assistant Secretary, L S G to send me that file but those papers are not available

28) The Mysore Municipal Sewage Farm is no doubt an ideal place to start a Dairy Farm and such a farm would also assist in removing the "Gowligars" from the slums where they are staying and tethering cattle while supplying good milk to the town people This was one of the items contemplated in the above proposals

29) The present file relates merely to a loan of Rs 30,000 to enable the Municipality to start a Dairy Farm They want the loan, free of interest and repayable in 10 instalments It is not however stated how the balance of Rs 57,000 for the items (noted below) referred to in the note annexed to the President's letter is proposed to be met -

Capital outlay on farm houses, etc	34,900
Staff quarters & offices	13,500
Machinery & buildings	8,350

The present loan of Rs 30,000 is barely enough for the purchase of the cows and buffaloes

30) Regarding interest to be charged on the loan asked for, we usually charge interest at 4½% on loans sanctioned to Municipalities and Local Boards It is however proposed in the Minister's minute above to reduce the rate of 2% It may not be desirable to make

Vide pages 240 & 242 of the Finance and Revenue Accounts for the year 1942-43

an exception in this case and reduce the rate of interest If necessary a subvention may be given 31) Re repayment of the loan, the President does not state how this will be ensured There used to be difficulty to provide for the Sinking Fund to liquidate the loans already existing It is presumed however that this repayment will be a first charge on the revenues of the Municipality

Mm Rh L?
Dewan, 32) The Tn Secy Angus has made a retrospective record but unfortunately no record of the gist is now available of the Scheme drawn up when he was President as the considered file Tn Secy is not available, this Legislative Branch should be able to account for the file we are now Questioned with what is to be done in the pending Cases obtaining in Mysore city. Para 28 (Tn Secy's note) Shows that the Scheme is desirable but that point raised Above is to be and Reference of Municipal Para 29 discusses the feasibility of the Scheme The note of the Municipal President (in the file) says that

The municipality wants to make a beginning; that funds are not readily available but would be available in the course by diversion from other heads etc; should the scheme holds forth abundant promise of success in the present circumstances, the experiment is well worth trying the only question is, whether the loan should be given free of interest, or at a nominal rate of 2% or at the standard rate of 4½% of the loan is to be ordinary purpose. we might have been justified in charging the standard rate of 4½% here, the supply of milk is in the interest of the health & welfare of the people of Mysore it is also the responsibility of the State & Society we have to encourage the municipality by showing concessions & grants, subject to the condition that should be scheme is a profitable one & where assistance is not expected in any case, it seems to me necessary that we should

encourage the municipality get on with this very desirable scheme & if the grant of a subsidy is favoured, we can address the views of the municipality DO 24/1

Subject - Starting of a Dairy Farm in the Municipal Sewage Farm, Mysore

In connection with the supply of pure milk which is a long felt want in the Mysore City, the Municipal Council have proposed the starting of a Municipal Dairy Farm as part of the Sewage Farm at Mysore In that connection the Municipal Council have obtained a comprehensive scheme from the Director of Agriculture The non-recurring and recurring expenditure thereof are estimated at Rs 91,750/- and Rs 26,359/- respectively The Mysore City Municipal Council have now proposed to adopt only a portion of the comprehensive scheme by starting a Dairy Farm at Mysore with 20 Sindhi cows and 20 Murrha buffaloes and two stud bulls and other necessary equipment, at a cost not exceeding Rs 30,000/- in all

As the City Municipal Council are not in a position to undertake this extra expenditure, they have resolved to approach the Government for the grant of a loan of Rs 30 000/- towards the initial expenditure for the purchase of live stock etc free of interest to be repaid in ten annual instalments

The President City Municipal Council requests orders on the following points -

(1) to start a Municipal Dairy Farm as part of the Municipal Sewage Farm

(2) to the grant of a loan of Rs 30,000/- to the Mysore City Municipal Council by the Government, free of interest, and repayable in ten annual instalments

(3) to purchase the necessary live-stock through the Agricultural Department

to entertain the necessary establishment

(5) to purchase implements and

(6) to incur such other incidental expenditure as may be necessary for the working of the Dairy Farm

As Government consider that ~~a well~~ The well thought scheme of milk supply to Mysore City is very desirable, the President was requested to state whether the Municipal Council are willing to take a loan of Rs 30,000/-, carrying interest at 2% for the purpose and the President has replied to say that the Council are agreeable to take the loan at 2% interest

The Dewan and the Minister, Revenue and Law are agreeable to the above proposals

The papers are circulated to the other Ministers in Council for opinion

Final Note by the Minister for ~~Education~~ Revenue & Law 9

Subject — Starting of a Dairy Farm in Mysore City

Consequent on the lack of adequate supply of pure milk and the excessive prices at which milk is sold by private vendors in Mysore City, the Municipal Council has proposed the starting of a Municipal Dairy Farm as a part of and adjunct to the Sewage Farm at Mysore. A scheme drawn up by the Director of Agriculture - contemplates, inter alia, a recurring and non-recurring expenditure of Rs.26,359 and Rs.91,750 respectively. After considering this scheme, the Municipal Council has decided to start a Dairy with twenty Scindhi cows and twenty Murha buffaloes for the present, involving an initial expenditure of Rs.30,000 for the purchase of live stock etc The President, Municipal Council, has solicited sanction to the scheme and to the grant of a loan of Rs.30,000 free of interest repayable in ten annual instalments.

The scheme proposed holds forth abundant promise of success and the experiment is well worth trying. The supply of pure milk in sufficient quantities is undoubtedly in the best - interests of the health and welfare of the citizens of Mysore, more particularly young children and nursing and expectant mothers It is therefore proposed to sanctionm a loan of Rs 30,000 carrying interest at 2 % repayable in ten annual instalments, the Municipality being required to submit the detailed scheme before actually drawing the loan and the loan being also disbursed in instalments according to the actual amount needed.

The Dewan and the other Ministers agree and I solicit the gracious sanction of His Highness to the proposal.

M. Siddaramappa

Minister for Revenue & Law.

Bangalore,
Dated, 8-4-1945.

Submitted to His Highness

I submit herewith a Final Note by the Minister for Revenue and Law on the proposal to grant a loan of Rs 30,000/- at 2% interest repayable in ten annual instalments, to the Municipal Council, Mysore City to start a Dairy Farm, for the gracious sanction of His Highness

S i r,

Subject Starting a Municipal Dairy Farm as part of the Sewage Farm

I have the honour to state that in connection with the supply of pure milk which is a longfelt want in the city, the starting of a Dairy in the Sewage Farm has been engaging the attention of the Milk Supply Sub Committee and the Municipal Council for some time past. The Director of Agriculture was requested to send a comprehensive scheme in this connection. The scheme sent by ~~him~~ this office with his letter No A H 343-1662/43-44 dated 19th June 1944 (copy enclosed) was discussed at length by the Milk Supply Sub Committee on the 26th July 1944.

The details of the Scheme were again gone through on the 3rd October 1944 when the Director of Agriculture attended the meeting held at the Sewage Farm and on his recommendation it is proposed to start the dairy with 20 scindhi cows and 20 murha buffaloes for the present, (vide copy of the proceedings enclosed) An office note (vide copy enclosed with the proceedings of the Committee was circulated among the members of the Municipal Council and the proposals made therein are approved (vide copy of Council Resolution No 228 dated 11th October 1944 enclosed

As the private milk vendors are selling milk at an abnormal rate, and even so, milk is not available in sufficient quantity, there is an immediate necessity for starting the dairy There is however no provision in the budget to meet the expenditure I therefore request early orders of Government for sanctioning the scheme and a loan of Rs 30,000/- free of interest repayable in ten annual instalments

P.T O

25

I solicit the favour of very early orders

I have the honour to be,
Sir,
Your most obedient servant,

PRESIDENT

DVS)

Office of the President,
City Municipal Council, Mysore.
Dated 6th October 1944

OFFICE NOTE

Subject Starting a Municipal Dairy Farm in Mysore City

In their meeting held on 9th February 1944, the Municipal Milk Supply sub Committee discussed the several aspects of the question of increasing the supply of pure milk to the city and resolved that the President may kindly speak to the Live-stock Expert and place definite proposals before the Committee for starting a small dairy farm as part of the Sewage Farm activities as early as possible

In pursuance of this resolution, a reference was made to the Director of Agriculture and under his direction, the Dairy Expert and the Veterinary Research Officer of the Agricultural Department visited the Municipal Farm and worked up the details and a scheme has been received from the Director of Agriculture vide enclosure This scheme was considered by the Committee in their meeting held on 26th July 1944 and as desired by the Committee the details were again dsicussed with the Director of Agriculture at the Municipal Farm on the 3rd instant and a copy of the Proceedings is herein enclosed

As can be seen from the proceedings, the proposed dairy farm is to be started as part of the Sewage Farm and the newly erected dry cattle shed has to be utilised, for housing the dairy cattle for the present, to avoid extra cost for construction of buildings The initial expenses for purchase of livestock, staff, etc , (taking up only a portion of the scheme for execution) are estimated at Rs.30,000/- and provision has to be made to meet this expenditure

As the details ofthis scheme, had not been worked up at the time of framing the municipal budget of the current year, no provision could be made therefor Large savings

27/-

cannot also be expected under any of the budget heads Hence the only course open is to make use of the model house fund in which a sum of Rs 86,204/- is available at present The houses built will be sold and the sale money will be credited to the fund which is likely to increase to Rs 1,20,000 Adding to this, a sum of Rs.26,000/- expected from the City Improvement Trust Board the total amount available will be Rs 1,46,000/- at the end of the year So a sum of Rs 30,000/- may be taken as a loan out of this fund and repaid in ten annual instalments, or earlier if possible out of the yield of the dairy

As an alternative, we have to approach the Government for a loan of Rs 30,000/- free of interest (repayable in ten years at Rs 3,000/- per year) in the interests of pure milk supply to the citizens The profit expected is Rs 3,000/- per annum which we could pay towards the capital borrowed from the Government

As the need for an adequate supply of pure milk in the city is very keenly felt, approval of the Council may kindly be accorded to the proposals embodied in the enclosed proceedings of the Milk Supply Committee, and

1 To start a Municipal Dairy farm as part of the Municipal Farm,

2 To take a loan of Rs 30,000/- out of the Model House fund subject to repayment in 10 annual instalments or to request Government for a loan of Rs 30,000/- free of interest repayable in 10 annual instalments,

3 For purchasing the necessary livestock through the Agricultural Department,

4 To appoint the necessary staff,

5 The purchase of implements and machinery etc , and

6 Incur such other incidental expenditure as may be necessary for the working of the Dairy Farm

The above proposals represent only a portion of the scheme and when the dairy farm gets into full swing, the question of purchasing some more heads of cattle, providing up-to-date machinery, strengthening the staff etc , may be

28

considered The above note is circulated among the members of the Municipal Council for approval in view of the urgency of the matter

8 H Thimmiah, Esq ,

1 Scheme sent by the Director of Agriculture with his letter No. A H 343-1662/43-44 dated 19th June 1944 in connection with the starting of a dairy farm

The Committee along with the Director of Agriculture met at the Sewage Farm and inspected the place proposed for locating the dairy farm On the recommendation of the Director of Agriculture, the Committee consider that it is desirable to make use of the new dry cattle shed that is being constructed for starting the dairy farm as attached to the Sewage Farm Water facilities for the dairy farm are also available near the selected place and till we are able to put up proper pumping machine, pickota arrangements may be immediately made so as to irrigate the area roundabout

It was also unanimously approved that the existing dry cattle shed being unfit to house the dry cattle, we must put up separate sheds to the north of the new cattle shed and segregate the dry cattle from the dairy farm cattle to be purchased in future In this connection, Krishnagara garden near Chamundi Hills which was resolved for acquisition as per Council Resolution No 809 dated 26th June 1943 was also inspected and it is strongly recommended that this farm may be acquired for housing the dry cattle and also constructing some Gokulam Houses The Director of Agriculture was of opinion that this garden land was quite suited for the purpose

The financial aspect for starting the dairy was also considered and as a first step to start the dairy farm, it is proposed to request the Government to purchase 20 scindhi cows and 20 murha buffaloes and two stud bulls and other necessary equipment not exceeding Rs 30,000/- in all.

31

This amount of Rs 30,000/- has to be provided for in the Municipal budget as part of the expenditure of the Municipal Farm and the President will kindly put up a note with regard to the ways and means of meeting this expenditure The Director was further requested to make necessary recommendations to Government approving the above scheme and selection of the place for locating the dairy farm and sparing scindhi cows and buffaloes from Sir Dinshaw Farm at controlled prices The President is also requested to kindly make necessary and urgent references to the Government for the needful The question of acquiring Krishnagara garden about which the Municipal Council and the Trust Board have already decided (vide their resolution Nos 809 dated 26-6-1943 and 20 dated 28-7-1943 respectively) may be expedited as it is pending from a long time

2 Letter dated 19th August 1944 from Mr D Kemparaj Urs, stating that he intends starting a small dairy farm and requesting to supply fodder at a concession rate

The Health Officer is requested to inspect the Dairy farm of Mr D Kemparaj Urs and submit a report regarding the advisibility or otherwise of running a dairy farm inside the city and how far the said dairy farm has been serving the public purpose, before we think of showing any concession regarding fodder

The Committee desires to convey their thanks to the Director of Agriculture

Sd/ R Ramachandra Rao Bhombore,
President

Scheme for Municipal Dairy for Mysore

This question was discussed with the President, Health Officer and members of the Sub Committee It is suggested that a Municipal Dairy may be organised in the vicinity of the present Municipal Sewage Farm, towards the northwest portion of the Farm and an additional 150 acres of land be acquired for the purpose A scheme has been drawn up for starting a model dairy to supply 600 lbs of milk in the first instance with a provision for its expansion, the cost not exceeding a lakh of rupees towards the initial organisation The location of the dairy farm in the immediate neighbourhood of the Sewage Farm is recommended as it offers a splendid situation and an unlimited source of green fodder for the dairy & cattle throughout the year

A sketch is enclosed of the site selected by us for locating the proposed dairy The place is situated on a higher level with good drinage and is far away from the septic tanks and proximal to the main road to Nanjangud The Municipality will have to make arrangements for the supply of clear and wholesome water for the dairy separately, as it is not possible nor is it safe to sink any w-ells in that locality A survey of the area has been made by Mr K Ranganatha Rao and Mr G Gopinath of this Department

Copy of note sent by the Director of Agriculture in Mysore, along with his letter No A H 343-1662/43-44 dated 19th June 44.

"A scheme for starting a model dairy farm at Mysore, as an adjunct to the Municipal Sewage Farm"

INTRODUCTION

No dairy farm could be called a "model one" if it is not of a self supporting nature A good model dairy farm should as far as possible ~~be~~ be self supporting as regards the feed and fodder of the animals To achieve this end a dairy farm should possess enough land for cultivation and grazing, and for the errection of modern buildings to facilitate clean production of milk Secondly, the local cows are undoubtedly very poor milkers, quite unsuited for dairy purpose, they will only be a liability rather than an asset to any dairy farm It is essential that the Farm should possess good cattle of milch strain, which will thrive quite well in our state , and also make the process of breeding easy and the enlargement of the whole system, towards a preconceived model scale Since scindhi cows and Delhi or Murrah Buffaloes give a fairly good yield and seem to thrive well in our State, it is our opinion that they are the most desirable and reliable breeds that could be imported to improve the practice of Dairying in our State The land selected should be such; as to facilitate the cultivation of all forage crops, both under irrigation and dry farming The availability of water through all seasons forms another important factor in maintaining the animals in health and the running of the farm in the most efficient and economic way Thus, a model dairy farm should be so organised as to form one unit with interdependent branches as under -

Dairy proper with cattle and equipments,
Cultivation section, with all agricultural works

The two aspects of the scheme should go side by side and the one will be best served by the other It is most desirable that the cost of cultivation of the farm should be separated from the cost of milk production ~~of~~ determine in what directions ~~and~~

3/4

economies can be effected in the cost of milk production From the above information, it is clear that to achieve a good success leaving enough room for further expansion and improvements, a scheme drawn on simple and economic lines and the adoption of the same has got far reaching effects than starting any scheme on a big scale It is with this humble opinion of ours that we have drawn up a small scheme of a model dairy farm which could be started in a good locality, preferably inside the Municipal Sewage Farm itself, leaving enough room for future expansions as conditions permit

THE SCHEME

A decent start could be made with a total herd of about 80 cattle This could be divided into two category of Buffaloes and cows Since all the herd will not be milking at the same time, we can only calculate the returns from 60% of them, which not only has to maintain the whole herd but also has to leave a little amount as profit, without which the encouragement and expansion of such a scheme will be of no avail Calculating on 60% basis, the working of the dairy will be as tabulated under -

Class	Total strength	Milking strength		Average yield per cow	Total yield
Cows (Scindhi)	40	$\frac{40 \times 60}{100}$	= 24	12 lbs	288 lbs
Buffaloes (Delhi or Murrha)	40	-Do-	= 24	15 lbs	360 lbs
		Total yield per day			648 lbs

If any dairy is able to produce 650 lbs of milk every day, in the most hygenic and pure form it can definitely be called a model dairy To maintain this number of animals to ensure their productive capacity without missing their health, the Dairy Farm should be run on a scientific basis with regard to (1) Breeding, (2) Nutrition, (3) Veterinary aids and (4) Cleanliness

The farm as far as possible be able to produce the feeds needed for the cattle inside the farm itself, which very much

95

cuts the cost of production in addition to giving nutritions fod
A good locality should be chosen where the soil will permit Agricultural operations The place should be such where ample amount of water is available through all seasons, to encourage cultivation, and also in keeping the Dairy near and clean In all about 150 acres of land (least) is needed, out of which about 50 (fifty) acres of land will be allotted for buildings cattle yards etc , leaving enough room for future expansion, as the dairy increa The rest, i e , 100 acres should be divided for dry crops, wet cultivation and grazing The crops grown should be such as best suited for the land and also for the use of the Dairy cattle

1 Dry crops Ragi, Jola, horsegram etc
2 Crops under irrigation Grasses (Guinea and Rhode) and lucerne

These crops should not only be enough for the cattle, but it also should be grown in excess which could be ensilaged in silos, which would be a blessing during the days of drought

When once the cultivation of fodder crops is ensured all we have to look outside as regards feeding is for concentrates, which will amount about 5 annas per head per day of lactating animals and the rest about three annas

The farm also should be the possessor of 2 good Pedigreed stud bulls and four pairs, at least of working bullocks

Financial aspects of a model scheme with 40 cows and 40 buffaloes, with a daily return out of 650 lbs of milk

Non recurring expenditure

(1) Livestock **

40 scindhi cows at Rs 380/-	Rs 15,200/-
40 buffaloes at Rs 400/-	Rs 16,000/-
4 pairs of bullocks at Rs 400/-	Rs 1,600/-
2 stud bulls at Rs 750/-	Rs 1,500/-
Total	Rs 34,300/-
or roughly	Rs 35,000/-

** The valuation is based on the present market rates and the fluctuating prices

(Continued)

(2) Capital outlay on Byres, farm houses etc

2 sheds for housing 40 animals each (back to back 20 on each side)	Rs 12,000/-
Calf pens to accomodate in 2 groupps	Rs 5,000/-
Parturition sheds, sick sheds etc ,	Rs. 2,000/-
Heifer and dry sheds in two groups	Rs 4,000/-
Bull Sheds	Rs 400/-
Bullock stall, cart room etc	Rs 1,500/-
Dairy rooms (receiving, storing and records)	Rs 4,500/-
Electric and pipe installations	Rs 3,000/-
Pump, storage tank etc ,	Rs 2,500/-
Total	Rs 34,900/-

(3) Staff quarters and offices

Office building attached to Dairy	Rs 2,000/-
Manager's quarters	Rs 4,000/-
Two clerks	Rs 2,500/-
Servants blocks to accomodate about 10 to 15 families	Rs 5,000/-
Total	Rs 13,500/-

Grand total on buildings Rs 13,500/- + 34,900/- = Rs 48,400/-

(4) Implements, machinery and appliances

One delivery cart (horse)	Rs 1,000/-
Three cycles	Rs 300/-
Two carts for agriculture use	Rs 500/-
Agricultural implements	Rs 1,000/-
Dairy appliances (prices not steady)	Rs 800/-
Delivery cans	Rs 500/-
Refrigerators and boilers (small type)	Rs 3,000/-
Buckets, pails etc ,	Rs 250/-
Veterinary implements	Rs 200/-
Furniture	Rs 300/-
Sundries	Rs 500/-
Total	Rs 8,350/-

Grand total of initial outlay

1	Livestock	Rs 35,000/-
2	Buildings	Ps 48,400/-
3	Machinery & appliances	Rs 8,350/-
	Grand total	Rs 91,750/-

II Recurring expenditure

Livestock maintenance (concentrates only) lactating animals at 5 annas per day = 50 x 1/3 x 30 x 12 =	Rs 6,000/-
Other 30 at 3 annas per day =	Rs 2,050/-
Total	Rs 8,050/-
Wages to coolies and other (for cultivation) field work, labour etc	Rs.2,300/-
Maintenance of van, cycle etc ,	Rs 500/-
Office expenses	Rs 200/-
Stationery	Rs 200/-
Total	Rs.3,200/-

Grand total Rs 11,250/-

S t a f f

1	Superintendent of the Farm (Rs 100-5-150)	Average cost	Rs 130/-
1	Asst on 65-5-100/-		Rs 90/-
1	Agriculturist (fieldman)		Rs 80/-
½ 1	Accountant and Recorder	45-3-60/-	Rs 56/-
1	Store Keeper		Rs 40/-
1	Typist clerk		Rs 40/-
1	Peon		Rs 14/-
		Total	Rs 450/-

Per annum Rs 4,200/-

Work establishment

8 caretakers at Rs 12/-	Rs 96/-
6 milkers at Rs 15/-	Rs 90/-
2 dairy boys at Rs 12/- each	Rs 24/-
4 calf boys at Rs 6/- "	Rs 24/-
1 watchman at Rs 12/-	Rs 12/-
2 cleaners at Rs 12/-	Rs 24/-
1 scavanger at Rs 12/-	Rs 12/-
2 drivers at Rs 12/-	Rs 24/-
Total	Rs 306/-

Per anhum Rs 3672/-

Returns:

Since we have selected good Pedigreed milch strain animals as out stock, on working the farm we can get more out of these animals than stated in the beginning to calculate the total returns The potentiality of a scindhi cow is about 20 to 25 lbs of milk daily and that of a buffaloe 25 to 30 So far calculations we can safely assume the scindhi to give 15 lbs and buffaloes to give 20 lbs and on an average of both as 15 lbs The market value can take it at 10 lbs a rupee

Then the returns will be

Total milking strength 48,
Total yield per day 48 x 15 = 720 lbs

The value of milk produced per day at 10 lbs a rupee = Rs 72/-
The total worth of milk per annum = Rs 26,280/-

Returns from calves

Total calves expected to be born	48
To be retained in herd at 10% of the total strength	8
Mortality allowance at 10%	8
Left over for sale	32

Taking the normal ratio of bull and cow calves as 1 1 and their value at 25 and 35 rupees respectively, the value of 32 calves

will be Rs 960/- Then total returns = Rs 27,240/-

Interest and depreciation

Interest on capital outlay 3% of	Rs 48,400/-	Rs 1,452/-
Equipment at 10% of	Rs 8,350/-	Rs 835/-
Livestock at 12% of	Rs 35,000/-	Rs 4,200/-
Total		Rs 6,487/-

Recurring expenses

Livestock maintenance and contingencies	Rs 11,250/-
Agricultural work	Rs 750/-
Interest and depreciation	Rs 6,487/-
Establishment	Rs 4,200/-
Work establishment	Rs 3,672/-
Round about Rs.26,360/-	Rs 26,359/-

Returns.	Rs 27,240/-
Liabilities	Rs 26,360/-
Estimated profit	Rs 880/-

In drawing up the scheme, calculations are not made on the maintenance of calves and their cost, since the market value of calves and heife-rs usually exceed their self supporting maintenances cost. The depreciation allowed on all cattle is 12% 10% of the calves born are selected and retained every year to have a general turn over of the whole herd in a period of 10 years

Calculations are also not made for the agricultural operations and their production since the produce of these will be utilised by the animal of the farm itself As such one is balanced by the other

Due to non-availability of Dairy machinery and their high cost, installations of such in the dairy are left out As such this dairy will be only catering for the liquid market and if it is desired to have it as an up to date processing and manufacturing centre as well, the capital outlay have to be increased by an additional sum of Rs 20,000/- to enable to get the machinery which falls under the following heads -

(Continued)

1 Pasteurising unit 2 Refrigerating unit		Rs 16,000/-
3 Separation Unit 4 Butter Making unit		Rs 4,000/-
	Total	Rs 20,000/-

This, to our humble opinion could be added little by little as the dairy develops and also as the prices of these machinery comes down

OFFICE OF THE PRESIDENT
CITY MUNICIPAL COUNCIL MYSORE

No MS-46-201/44
Encl

Date 10th Novr. 1944

From
R RAMACHANDRA RAO BHOMBORE Esq, B A
PRESIDENT, CITY MUNICIPAL COUNCIL
MYSORE

To
C.Narayanaswami Naidu, Esq., B A., B L.,
Legal Remembrancer and Secretary to Government,
Law Department, Bangalore.

Sir,

With reference to your letter No.L 4066 dated 31st October 1944, enquiring whether a survey has been made in regard to the needs of the citizens for the supply of milk in the city, I have the honour to state that no such survey has been made

The present scheme for the starting of the dairy farm on a small scale has been taken up as an experimental measure and after seeing the results thereof, it is proposed to expand it on a large scale. I am sure that the scheme will have a detefent effect on the private milk suppliers in bringing down the high rates at which milk is now selling and also solve the milk supply problem to some extent. It may also set a good example to the private milk vendors, to supply pure milk to the citizens. As it is found difficult to obtain proper supply of milk, this scheme is proposed to be taken up, though on a small scale as an urgent measure to ease the situation to some extent.

In these circumstances, I request that the scheme and the loan prayed for by the Council, may kindly be sanction ed at an early date

I have the honour to be,
Sir,
Your most obedient servant,

R Ramachandra Rao
President.

The President, Mysore City Municipal Council
~~City Improvement Trust Board~~,
Mysore

Sir,

With reference to your letter No. [illegible] dated 14th October 1944 regarding starting of a municipal dairy ~~farm~~ as part of the Sewage ~~farm~~ in the Mysore City, I am directed to state that Government are agreeable to the grant of a loan of Rs 50,000/- repayable in 10 annual instalments as requested by you but the loan will, ~~however~~, carry interest at ~~4~~ 2½%. I am therefore to request you ~~are~~ to be so good as to place this question before the municipal council ~~for~~ and forward their opinion as early as possible

1) The loan on these conditions is not acceptable to the municipality. The Govt will consider the question of granting some subsidy towards the ~~subsidy~~ recurring expenditure

In this connection I am to observe that the recurring expenditure will, presumably, be more than offset by the receipts. The details of the recurring expenditure involved in the proposal and the sources from which it will be met, may be furnished to Government very early

3) ~~A good~~ Scheme of milk supply to the City of Mysore is ~~a~~ very desirable ~~one~~ and action should be taken to give effect to it with the least possible delay

3) Govt Consider that a well-thought out Scheme of milk Supply to City is very desirable & should be proceeded with as expeditiously as possible from

I have etc

Proceedings of the Government of His Highness the Maharaja of Mysore

Read— Correspondence ending with letter No M5 46-201/44 Dy 10-11-44 from the Pdt, cfs mkt cl, Mysore in the matter of starting a Mk Dairy Farm and ~~part of the Sewage Farm~~ at Mysore

Order thereon —No 1-10737-9

~~Government~~

Consequent on the lack of adequate supply of pure milk and the excessive prices at which milk is sold by private Vendors in Mysore city, the Mysore mkt cl have proposed the starting

of a Dairy Farm as a part
of an adjunct to the Sewage
Farm at Mysore. The Scheme
drawn up by the Dir of Agriculture
in this behalf as requested
by the Govt contemplates,
inter alia, a recurring and
non-recurring expenditure
of Rs 26,359 and Rs 91,750
respectively. After considering Ps 2
the scheme in detail, the Govt
have, at their meeting held
on 11-10-44, approved of the proposal
to start the Dairy with twenty
Sanghi cows & twenty Murha
buffaloes for the present, involving
an initial expenditure of Rs 30,000/- List of Enclosures
for the purchase of the live stock etc:
The Govt, viz Govt, has solicited
sanction to the scheme and to
the grant of a loan of Rs 30,000/- Copied by
free of interest and repayable in Examined by
ten annual instalments
& Govt consider that the proposed PA 3
